Aspire Skin Care Product with the purchase of a Hydrafacial Treatment

This 30 minute treatment is designed to leave you with glowing skin and able to return to normal activities with no downtime. After the skin is cleansed with a lactic acid solution, a mild glycolic/salicylic peel is applied to help clear the pores of congestion and debris. The skin is then infused with specially designed serums containing antioxidants and peptides to help increase collagen and improve the appearance of enlarged pores, fine lines, acne-prone skin, hyperpigmentation and brown spots. Blue or Red LED lights finish the treatment to help calm the skin resulting in a smooth, radiant complexion. Monthly treatments are recommended to maintain results. Great for a special event or occasion and safe for all skin tones.

Available at the Middletown, Warwick, and Riverside Locations.
While supplies last.
